

Standard Laboratory Tests Master List (Indian Clinic MVP)

This document contains standard seed data for the `laboratory_tests` table. These are the most frequently prescribed diagnostic tests in a typical Indian clinic setting.

1. Hematology (Blood Tests)

Test Name	Abbreviation	Description
Complete Blood Count	CBC	Basic screening for anemia, infection, and overall health.
Erythrocyte Sedimentation Rate	ESR	Checks for inflammation in the body.
Hemoglobin	Hb	Measures the amount of hemoglobin in the blood; checks for anemia.
Blood Grouping & Rh Typing	Blood Group	Determines the patient's blood type (A, B, AB, O) and Rh factor.

2. Diabetology (Sugar Profiling)

Test Name	Abbreviation	Description
Fasting Blood Sugar	FBS	Measures blood glucose after an overnight fast.
Post Prandial Blood Sugar	PPBS	Measures blood glucose exactly 2 hours after eating.
Random Blood Sugar	GRBS / RBS	Checks glucose levels at any given time of day.
Glycosylated Hemoglobin	HbA1c	Provides a 3-month average of blood sugar levels.

3. Biochemistry & Organ Profiles

Test Name	Abbreviation	Description
Lipid Profile	Lipid	Checks cholesterol levels (HDL, LDL, Triglycerides) for heart health.
Liver Function Test	LFT	Assesses liver health (Bilirubin, SGOT, SGPT).
Kidney Function Test	KFT / RFT	Assesses kidney health (Urea, Creatinine, Uric Acid).

Thyroid Profile	T3, T4, TSH	Checks thyroid gland function.
-----------------	-------------	--------------------------------

4. Infectious Diseases (Fever Panels)

Crucial for Indian clinics during monsoon/fever seasons.

Test Name	Abbreviation	Description
Widal Test	Widal	Screening test for Typhoid fever.
Dengue NS1 Antigen	Dengue NS1	Early detection of Dengue virus.
Malaria Parasite Smear	MP Smear	Microscopic blood test to detect Malaria.
C-Reactive Protein	CRP	General marker for acute inflammation or infection.

5. Clinical Pathology (Urine & Stool)

Test Name	Abbreviation	Description
Urine Routine & Microscopy	Urine R/M	General screening for UTI, kidney issues, or diabetes.
Urine Culture	Urine C/S	Identifies specific bacteria causing a Urinary Tract Infection.
Stool Routine	Stool R/M	Checks for gastrointestinal infections or parasites.

6. Vitamins & Deficiencies

Test Name	Abbreviation	Description
Vitamin D3	Vit-D	Checks for bone health and immunity deficiencies (very common).
Vitamin B12	Vit-B12	Checks for nerve health and specific types of anemia.
Calcium (Total)	Calcium	Measures calcium levels in the blood.

Implementation Note for Antigravity: When generating the seed script (e.g., using a Python script with SQLAlchemy), parse this list to insert rows into the `laboratory_tests` table using the `Test Name` as the `name` and the `Description` as the `description` . Pricing will be handled separately or dynamically based on clinic settings.
